

Interview Tip

**What is your
Salary
Expectation?**

My Salary expectation
is X LPA

My Salary expectation
is between range X and Y

I have not decided it yet, can
we discuss it later ?

The correct
answer to this
question
depends upon,
what stage of
the interview
process are you
in

Without knowing the full scope of the work, my expected salary would be between X to Y, but as I gain full understanding of the role,
I might have to revise it.

Based on my market research & experience of X yrs, a similar role in this would be worth anywhere between Y-Z.

I'm however flexible & open to hear about the company's compensation structure for this role.
